

MUHAMMED MAHMOUD GOUDA

.NET Developer

muhammedmahmoudgoda66@gmail.com | +201064665247 | Dakahlia , Egypt
[linkedin.com/in/muhammed-mahmoud-gouda](https://www.linkedin.com/in/muhammed-mahmoud-gouda) | github.com/Muhammed-Mahmoud-Gouda

CAREER OBJECTIVE

Motivated .NET Developer with strong expertise in C#, SQL Server, and object-oriented programming. Skilled in building scalable applications, applying clean code practices, and solving complex problems. Open to contributing technical and analytical skills to innovative software projects.

EDUCATION

Bachelor's Degree in Computer Science

Zagazig University | Sep 2023 – Present

EXPERIENCE

Full-Stack .NET Trainee – Digital Egypt Pioneers Initiative (DEPI)

Dec 2025 – Present

- Gained hands-on experience in ASP.NET, C#, SQL Server, and full-stack development across 3+ realworld projects.
- Applied OOP principles and clean code practices, reducing code duplication by over 30% in team projects.
- Collaborated within a team of 5+ developers, enhancing communication and problem-solving skills.

TECHNICAL SKILLS

Back-End: ASP.NET Core, ADO.NET, .NET Framework

Front-End: HTML, CSS, Bootstrap

Database: Microsoft SQL Server, Database Design

Programming Languages: C#, C++, SQL

Tools: GIT, VS Code, Visual Studio, SSMS

Other: Data Structures, Algorithms, Problem Solving, Networks, OOP

Soft Skills: Adaptability, Detail-Oriented, Communication, Deep Learner

PROJECTS

Evnetify Pro (Event Management System) | ASP.NET Core | May 2026 - Present

Technologies: C#, .NET 8, ASP.NET Core MVC, Entity Framework Core 8, SQL Server 2022, Paymob API, HTML5/CSS3, JavaScript

- Architected a modular N-Tier Clean Architecture web application using ASP.NET Core MVC 8, EF Core 8, and SQL Server 2022, adhering to SOLID principles and Clean Coding guidelines.
- Eliminated ticket-overselling race conditions by 100% by implementing EF Core Optimistic Concurrency Control (via RowVersion) during concurrent booking transactions.
- Engineered a reliable notification system using the Transactional Outbox Pattern and background workers (IHostedService) to guarantee email delivery and survive SMTP failures.

- Optimized database performance on hot paths by denormalizing fields and creating targeted indexes, reducing QR entry validation query time to a single index seek ($O(\log n)$).
- Implemented secure payments & queuing, integrating Stripe API via Strategy Pattern and building a dynamic FIFO waiting list queue for sold-out event capacities.
- Applied robust security measures, including resource-based authorization for multi-tenant isolation, HMAC-SHA256 secure QR tokens, and Google OAuth 2.0 with email OTP verification.

Pizza Ordering App | C# / WinForms | Sep 2025 – Oct 2025

- Built a desktop application with 4+ customization options (size, toppings, crust, dining option), handling 20+ possible order combinations.
- Implemented real-time price calculation with 0 manual refresh required, updating instantly across all order changes.
- Reduced order summary errors to 0 by integrating automated price updates and dynamic order validation.

COURSES & CERTIFICATIONS

Programming Fundamentals – Programming Advice | Feb 2024 – Aug 2025

- Applied C++ and OOP concepts in practical projects, designing modular systems with efficient data handling.
- Developed backend features using C# and SQL Server, strengthening database integration skills.

Foundational C# – freeCodeCamp & Microsoft | Dec 2025

- Validated proficiency in C# fundamentals including syntax, control structures, and OOP principles.
- Strengthened ability to build maintainable backend solutions using best practices in .NET development.
